- Supported on Industry-Standard Windows® XP- and Windows Vista®-Based PCs
- Hybrid Solution That Seamlessly Integrates Analog Cameras, Encoders, and the Latest IP Technology
- Supports Third-Party Applications, Video Analytics, and Data Transaction Information
- Future-Proof Video Surveillance Application
- Logical Cameras and System Groups
- Support for Multiple Monitors
- Quick Review of Recorded Video
- Quick Sort by Device Name, IP Address, or Custom Definition
- Multicamera Sequential Tours
- Pan/Tilt/Zoom (PTZ) Camera Control
- Digital Zoom
- Audio Support

DS ControlPoint is a revolutionary new graphical user interface that allows users to monitor and manage any combination of analog and IP devices through a single digital video surveillance software application.

DS ControlPoint interfaces with DX4500, DX4600, DX8000, DX8100, and all DVMS software to enable seamless and progressive migration from analog to IP environments. With support for high-definition multimonitor navigation and control, **DS ControlPoint** provides a tabbed environment that allows the end user to quickly switch between several work spaces. **DS ControlPoint** also displays exceptional high-quality images captured by Pelco IP cameras with Sarix™ HD technology. Accessing live and recorded data is made simple by switching between tabs with a single click. Critical data can be accessed, monitored, and managed from multiple locations. The system's open architecture platform provides scalability, flexibility, and future integration of advanced feature sets.

- Video Export Wizard
- Video Authentication
- Video Analytics Support (Active Alert)
- Tabbed Work Area with Context-Sensitive Icons
- Right-Click Functionality from Secondary Navigation or Tabbed Work Area
- Data from Third-Party Devices, Alarms, Events, and Audio Displayed in Any Window Pane

The **DS ControlPoint** window panes provide access to more than just video. Any data output, including transaction data from a cash register or point of sale device, alarm data from a video analytics application, or alarm notifications, can be placed into any **DS ControlPoint** window pane. **DS ControlPoint** provides a single client user interface to the critical data in your organization.

DS ControlPoint ships with all Digital Sentry systems and can be downloaded from www.pelco.com.
